## THE MODERN HUSKING BEE.

Remember the good, old-fashioned husking bee in a dimly lighted barn where you used to sit beside your lady love busily hunting for a red ear of corn so that you might fairly gain the privilege of a kiss which its discovery earned?

Nowadays the scene is more up-to-date. Picture a farm yard tastefully decorated with Japanese lanterns, a pile of the harvested corn shocks in the center around which cluster groups of fashionably gown motorists and the whole place enriched by stabled motor cars whose acetylene lamps illumine the scene.

The jolly party immediately fell to work husking the yellow grain and thereby gained a fine appetite for the supper that followed. Of course, cider and doughnuts were on hand. After disposing of the supper and husking the couples crowded into the barn and danced.—Cleveland Plain Dealer.

## THE ACTUALITIES.

"Gertrude Atherton says to let the women smoke if they want to." "Well, let it go at that. They won't smoke if they don't want to, and if they do want to you can't stop 'em."—Exchange.

## CONSTRUCTION IS ASSURED

Certain Completion Phoenix-Glendale Suburban Line

## NO CESSATION OF WORK

Whether Building Will Be Prosecuted From Orange-wood West or From Glendale East Is Still Question Which Is in Doubt.

The connection of Phoenix and Glendale by a suburban electric line has passed from the environment of doubt and uncertainty that has surrounded it for more than a year since the project was seriously undertaken and is now a positively assured enterprise. A settled purpose to build it if possible has been expressed for months. It is now demonstrated to be possible and construction preliminaries are under way. Final assurance that the road would be built was given last night by S. H. Mitchell after it was learned that ninety-seven right-of-way from property owners to the railway company, were yesterday put on record.

S. H. Mitchell left last night for Los Angeles to confer with General M. H. Sherman and others respecting the new construction and incidentally in respect of other projects that are of interest to the city and valley, the nature of which is not disclosed. Mr. Mitchell says that is not yet settled whether construction of the Glendale-Orange-wood line, which has been the gap in doubt, will be prosecuted from the Orange-wood end or from the Glendale end. The entire line will consist of the Phoenix-Indian school line which has been operated for years, its further extension from Lincoln Place to Orange-wood, two miles of which is now built, and the final division connecting Orange-wood with Glendale.

The road will be finished as far as Orange-wood in about ten days, and within two weeks to the center of Orange-wood on Central avenue. If arrangements can be made for an ample supply of power for construction purposes at the Orange-wood station, the construction of the Orange-wood-Glendale division will be pushed along from the Orange-wood end. Otherwise the material will be taken to Glendale by steam railway and construction be started from that Glendale end.

Notwithstanding the filing of the ninety-seven right-of-way deeds yesterday a part of the Glendale-Orange-wood route is still in some doubt. There are yet some gaps in the right-of-way concerning which the builders have alternative recourse, and the exact line in these places is yet to be settled and will depend on the liberality of property owners, or how desirous they are of seeing the line completed. W. J. Murphy is looking after this phase of the situation and the line of course will be built where it is most advantageous, all things being considered. When it is finally determined where it must go, in the event amicable settlement cannot be arrived at concerning right-of-way, the matter will necessarily have to be taken into court on condemnation proceedings. It is believed, however, that there will be little trouble, as everybody is bound to admit the desirability of the road, and it will be merely a matter of getting together on how much this one or that one may claim to be damaged, though in most instances it would appear that the property would be benefited.

## AN EYE TO BUSINESS.

The first play I saw written was "The Girl I Left Behind Me," with which Charles Frohman opened his Empire theater in New York in January of 1893. The earlier work had been done at Mr. Belasco's apartments in the hotel in Madison Square since demolished. There my father's original scenario was thoroughly gone over under the master eye of Mr. Belasco, writes Vanderheyden Fyles in the November Metropolitan Magazine. Those sessions I never saw, although an incident of the last day there has always stuck in my mind. Mrs. Leslie Carter and her mother had apartments in the same hotel and the dramatists were accustomed to lunch with them. When Mr. Belasco decided to shift his work to our house, I went down with my father one morning to gather together such of his writing materials as were at the hotel. On the way out my father stopped to make his farewells to Mrs. Carter and her mother. The former was not yet fully dressed, so without parting the curtain to her boudoir she slipped a long arm through for a goodby handshake. The unconsidered action was peculiarly effective. Mr. Belasco who sees everything and forgets nothing, gave no indication of noting the incident at the time. Several years later I was surprised to come upon its counterpart in his drama of "The Heart of Maryland," developed into a picturesque and important scene.

George Ade as a dramatist is as freely a rewriter as he is a brilliant first-shot. But with him it is rather a matter of witty after-touches than laborious readjustment. An instance—not just of the Ade patness, but rather more especially of how a much-quoted line sometimes springs into being quite by accident—oc-

## EVENING CLOTHES

## That Are Hard to Advertise

The reason this advertisement does not carry an illustration is because **Adler-Rochester Evening Clothes** are unlike any others. Pictures---particularly newspaper pictures---fail to do them justice.

Neither does the success of these famous clothes lie in what is **claimed** for them. It is in their actual appearance when worn---the aristocratic air they carry---the faultless appearance of each wearer---that is causing such a widespread enthusiasm over

## Adler-Rochester Evening Clothes

There are strong truths to be told about these---about the way they are made, the rare quality of material, the scientific methods of obtaining fit, etc.---truths that without investigation would be utterly unappreciated.

So we want you to come in and talk to us about dress clothes. In the famous Adler-Rochester model plant there are journeymen tailors working day and night making all sizes of the smartest styles in Full Dress and Dinner Coats and we draw on this product at a moment's notice. Evening clothes are either **right** or **ridiculous**.

Remember that your wardrobe is incomplete without Evening Clothes---that at some time you will feel the need of such **Adler-Rochester Clothes**. So don't delay your visit. Come in tomorrow.

## NEVER STOP PLAYING.

Real Danger Lies in Dropping Athletics, Not in Overdoing Them.

An athlete is like an aeronaut---safe enough while going, but in danger the moment he stops, especially if he stops suddenly.

If the first great danger of athletics for the professional, or business man, the brain-worker and man of sedentary habits generally is not getting enough of them, the second is like unto it---stopping them too soon, writes Dr. Woods Hutchinson in Outlook. No little of the bad after-effects so frequently ascribed to athletics in college and school life is really due to their sudden discontinuance after graduation.

The building of man is never finished, until he is dead. His life is all in one piece, and what is good for him at one stage of his existence, is mutatis mutandis, good for him in all. While man's mere stature and gross weight, and even "horsepower" may have attained their maximum by 22 or 23, the efficiency of both body and mind, for his particular life-work, ought to, and under most circumstances does go on steadily increasing until he is 50, 55 and even 60 years of age. And the same health-giving agency---exercise in the open air---which has been the very life and development, is equally indispensable to his further functional development and growth in efficiency. We not merely limit our growth, but actually shorten our lives by

taking it for granted that we have reached our limit at a certain age or stage, and may, therefore, drop the means of further progress---play in the open air. When we stop playing we stop growing!

## THE BANANA AS A FOOD

The woman who said she preferred bananas to many other fruits because their skins protected them from contamination was right and authorities on diet tell us that the banana is an almost perfect food. Many of the people who live in countries where bananas grow are said to practically subsist on this fruit and to maintain a great degree of physical strength.

## OXYPATHY AGAIN TRIUMPHANT

All that medicine CAN do is to call a halt and give NATURE a chance to rally her forces, although frequently ruining one organ while trying to help another. You might as well use bugles in place of bayonets as drugs in place of food and FRESH AIR.

The relief of disease is no longer a matter of providing a few powders or potions; we have got beyond that. More and more of our energy and brain power must be devoted to the cheerful and POSITIVE task of keeping our bodies so strong and wholesome and vigorous that they can defy disease.

Disease is largely if not wholly caused by the lack of OXYGEN in the body for the human system is then deprived of the power to ward off disease.

The crowning glory of all man's conquests has been his discovery for utilizing the full benefits of Ozone or Oxygen, now fully acknowledged the only perfect eliminator of sickness.

What has heretofore prevented the universal use of oxygen for the cure of disease has been the inability to get quantities of it into the system. To reach the seat of the complaint with a quantity of oxygen, in an inexpensive manner has always been a puzzle.

## The Oxygenator Solves the Problem

It is the only method of restoring to the body its normal supply of OXYGEN, and scientists have found that 95 per cent. of the vital force of the human body is derived from THE AIR WE BREATHE.

The greatest instrument that has ever been invented for appropriating the oxygen of the air and compelling the human body to absorb it, is the Oxygenator.

The Oxygenator is the most powerful Oxyphatic device ever placed in the hands of the public for self-treatment, and has just received the GOLD MEDAL in Canada, on that account.

The wonderful strides Oxyphathy is making is well illustrated in the following case, where the OXYGENATOR cured.

## INDIGESTION

111 State Street, Santa Barbara, Calif., Oct. 10, 1910.  
The Oxygenator Co., Santa Barbara, Calif.

Gentlemen: On Sept. 4, 1910, I bought a "OO" OXYGENATOR, hoping to cure a very bad case of indigestion and constipation. I also had touches of kidney trouble and asthma, with Bronchitis occasionally, and now these ailments seem to have all left me.

Considering I have only used the OXYGENATOR five weeks and that I am nearly 70 years of age, I think the results are nothing short of wonderful. I can heartily recommend the OXYGENATOR to all sufferers from the above ailments. I have not felt so well in years and I shall use the OXYGENATOR occasionally to keep me well.

Any questions concerning the OXYGENATOR will be cheerfully answered. Sincerely yours, MRS. PATIENCE HOWARD.

To those who are sick from any cause whatever, the OXYGENATOR IS WORTH ITS WEIGHT IN GOLD. It is a little doctor in your home, ready instantly to respond to a call of distress.

THE OXYGENATOR never wears out, never needs recharging and frequently saves its cost in a single siege of sickness.

## Flood Your Whole System with Oxygen

till your sickness is gone forever.

The very minute you apply the OXYGENATOR to your body you start in action the greatest curative method of the present century, and the healing goes steadily on till every function and organ is in tune with the great LAW OF NATURE, and you are really LIVING.

## The Oxygenator Is Not Expensive

It is sold on easy terms and will save its cost many times over.

In the OXYGENATOR you get your money's worth. No one can estimate the value of PERFECT HEALTH like those who have lost it and then recovered it. We have testimonials by the hundreds, saying: "I would not part with my OXYGENATOR for ANY MONEY."

Let us prove to YOU that what we say is TRUE. We can show you proof right here at your own door. Why should you continue to suffer?

WRITE FOR BOOK "OXYPATHY."
